

Restore Natural Balance with the F&P 850™ System

Fisher & Paykel Healthcare is committed to advancing patient and clinician care with a comprehensive family of products that restore natural balance.

With a single device, the F&P 850 System delivers humidity along the F&P Adult Respiratory Care Continuum™, according to the patient's respiratory and therapy needs. Comprising the [MR850 heated humidifier](#), [MR290 auto-fill chamber](#) and [RT-series breathing circuits](#) – it offers ONE simple, multi-configurable solution for all patients.

F&P 850™ System =

Humidifier

+

Breathing Circuit Kit

The F&P 850 System combines the MR850 humidifier, MR290 automatic dual float chamber, and the RT heated wire breathing circuit.

The F&P 850 System has been designed to be simple to operate, while answering the strong call for a high performing solution capable of operating in either [Optimal Humidity](#) (37 °C, 44mg/L) or [Essential Humidity](#) (31 °C, 32mg/L) control modes. Significant benefits flow from one system which can be configured to deliver optimal outcomes for all therapies across the care continuum.

- » **One System for all Patients.** The ability to reconfigure one system for all respiratory therapies translates to better follow-through care.
- » **Simple and easy to learn.** One easy-to-use, intuitive system leads to greater staff confidence and reduced training time.
- » **Efficient Inventory Management.** One System equates to less inventory requirements.
